Summary

Product designer with 5+ years in enterprise SaaS and fintech. I build scalable design systems and component libraries, refine complex workflows, and craft motion with Rive, from pre-PRD exploration to production-ready handoff. I also ship my own products with AI (Notate, built with Claude Code).

Experience

Turinglabs | Product Designer | Feb 2023 – Present | Karnataka, India

- Redesigned the core DCF (discounted cash flow) flow into a guided experience for private-equity workflows.
- Designed the Equity Simulation feature, letting investors stress-test scenarios before making investment decisions.
- Rearchitected the colour-token layer of a multi-brand enterprise SaaS platform: 157 component-scoped tokens became 64 semantic tokens in three tiers (59% fewer). Designed the model, the naming grammar, the accessibility pairing rules and the migration plan.
- Cut theming a new client from 2–3 days of manual remapping to a validated pipeline step under an hour; WCAG AA contrast is checked when a token is defined, and token files shrank from 137KB to 37KB.
- Rolled it out over three months alongside production work (documentation first, then deprecation warnings, then errors), with a gated request process for new tokens.

Larsen & Toubro Infotech | UX / Product Designer | Aug 2021 – Dec 2022 | Karnataka, India

- Redesigned enterprise analytics dashboards and internal tools for manufacturing and infrastructure clients.
- Rebuilt data-heavy reporting interfaces to surface critical information faster.
- Standardised UI patterns across modules and authored shared component specifications and redlines that developers could build from.

Studo Sorted | Design Consultant | 2021 – 2022

Camberry Studio | Motion Designer | Aug 2019 – Jul 2020 | Karnataka, India

- Motion design, explainer videos and UI animation for ed-tech, real estate and consumer product clients; established style guides and motion principles.

Projects

Notate, Chrome extension | 2026

- Made every product call and designed every surface; built it solo by directing Claude Code. First Chrome Web Store submission four weeks in; now live at v1.1.5.
- Turns any page (localhost, staging, internal tools) into a Jira, Linear, GitLab or Trello ticket with element or area capture, screen recording with on-page drawing, a 60-second DOM replay, and a context file written for coding agents.

Artos, personal finance app (independent) | 2019 – Present

- Product designer for an Android investment and expense tracker (10k+ downloads, ~1,500 DAU), partnering with its developer.
- Reframed Market Watch, used by only 2% of daily users, from a delayed price ticker into an insight surface; benchmarked Zerodha, Groww, Upstox and Robinhood and built a signal-card structure around how investors scan (what's moving, is it real, is there an opportunity).
- Shipped a full app redesign and ELI5 financial explainers; the redesign initially caused a 30% user drop-off, which I diagnosed through research and analytics and am iterating on.

UI interactions (Artos, Taralipi) | Ongoing

- Interaction and motion studies for products I build, such as spring-driven text selection, rotatable 3D chart columns and rings, and collaborator stacks that make room on hover.

Skills

Product design: UX, UI, interaction and motion design, information architecture, wireframing, prototyping, user research, usability testing, accessibility (WCAG AA), cross-functional collaboration

Design systems: Component libraries, design tokens, semantic token architecture, theming, style guides, pattern libraries, cross-platform consistency

Domains: Fintech, private equity, financial modelling (DCF, equity simulation), enterprise SaaS, analytics dashboards, consumer mobile apps

Tools: Figma, Framer, ProtoPie, Rive, Sketch, InVision, Zeplin, Adobe Photoshop, Illustrator, After Effects, Claude Code

Languages: Telugu (native), Tamil, Hindi, English

Education

Lovely Professional University | Bachelor of Technology, Mechanical Engineering (Honors) | 2014 – 2018 | Punjab, India

Sri Chaitanya Junior College | Higher Secondary (Math, Physics, Chemistry) | 2012 – 2014 | Andhra Pradesh, India
