Summary

Designer with 5+ years across fintech, enterprise SaaS and consumer products. Specialises in design systems, data-heavy workflows and accessible (WCAG AA) interfaces, and designs and builds products independently (Notate, Artos).

Experience

Turinglabs | Product Designer | Feb 2023 – Present | Karnataka, India

- Redesigned the core DCF (discounted cash flow) flow into guided steps that retail investors could actually follow.
- Designed the Equity Simulation feature, letting investors stress-test scenarios before making investment decisions.
- Rebuilt the design token architecture as a three-tier semantic model: 157 component tokens reduced to 63 semantic tokens, cutting the token payload 73% (137KB to 37KB).
- Cut client theming time from 2–3 days to under an hour, with WCAG AA contrast validated at token definition.

Larsen & Toubro Infotech | UX / Product Designer | Aug 2021 – Dec 2022 | Karnataka, India

- Redesigned enterprise analytics dashboards and internal tools for manufacturing and infrastructure clients.
- Rebuilt data-heavy reporting interfaces to surface critical information faster.
- Standardised UI patterns across modules and authored shared component specifications.

Camberry Studio | Motion Designer | Aug 2019 – Jul 2020 | Karnataka, India

- Motion design and animation for ed-tech, real estate and consumer product clients.
- Produced explainer videos and UI animations; established style guides and motion principles.

Projects

Notate, Chrome extension | 2026

- Designed and built with Claude Code; live on the Chrome Web Store at v1.1.3.
- Element and region capture, screen recording and 60-second DOM replay, with push to Jira, Linear, GitLab and Trello.

Artos, personal finance app (independent) | 2019 – Present

- Led end-to-end design in partnership with a developer for an Android investment and expense tracker (10k+ downloads, 3.6★, ~1,500 DAU).
- Shipped a full app redesign, ELI5 financial explainers and the core user flows.
- The redesign initially caused a 30% user drop-off; diagnosed the causes through research and analytics, and now iterating on fixes.

Skills

Product design: UX, UI, interaction design, information architecture, wireframing, prototyping, user research, usability testing, accessibility (WCAG AA), responsive design

Design systems: Component libraries, design tokens, semantic token architecture, theming, style guides, pattern libraries, cross-platform consistency

Domains: Fintech, retail investing, financial modelling (DCF, equity simulation), enterprise SaaS, analytics dashboards, consumer mobile apps

Tools: Figma, Framer, ProtoPie, Rive, Sketch, InVision, Zeplin, Adobe Photoshop, Illustrator, After Effects, Claude Code

Other: Motion design, animation, stakeholder communication, cross-functional collaboration, Agile/Scrum

Languages: Telugu (native), Tamil, Hindi, English

Education

Lovely Professional University | Bachelor of Technology, Mechanical Engineering (Honors) | 2014 – 2018 | Punjab, India

Sri Chaitanya Junior College | Higher Secondary (Math, Physics, Chemistry) | 2012 – 2014 | Andhra Pradesh, India
